PROJECTS

Code & Chaos 🔗 | MERN Stack, Socket.IO, TypeScript

2025

- Built a real-time head-to-head coding battle platform with instant matchmaking using Socket.IO.
- Implemented JWT-based authentication with role-based access for Admin and Player dashboards.
- Designed a scalable Node.js and MongoDB backend with match history and win/loss tracking.
- Developed a modern animated frontend using React, TypeScript, Tailwind CSS, and Framer Motion featuring live matchmaking UI, VS screen, battle arena, and detailed match history views.

Quizzzz-Whizzzz 🔗 | MERN Stack

2025

- Developed a full-stack Quiz platform enabling users to create, manage, and attempt quizzes with instant scoring.
- Implemented JWT & bcrypt authentication with role-based access for all to ensure secure workflow.
- Designed optimized MongoDB schemas and modular React components for scalability, reusability, and clean UI.

Campus-Connect 🔗 | React, TypeScript, Node.js, MongoDB

2025

- Created a smart academic platform with Teacher & Student modules for attendance, results, timetable, and syllabus management.
- Implemented predictive attendance analysis to calculate future class requirements based on academic criteria.
- Developed a secure MERN backend with JWT authentication, optimized APIs, and cloud storage via MongoDB Atlas.
- Built clean dashboards using React, Tailwind, shadcn UI, Zod, RHF, and Axios for a smooth and modern user experience.
